FD 220E FULL ELECTRIC

Front deck mower with collection,
the first 100% ELECTRIC GRILLO!

The FD 220E is a **full electric professional mower**, designed for high performance, maximum comfort, low noise and zero emissions.

The **excellent cutting quality** and the large electric power available allow the FD220E to be a mower suitable for the most demanding gardeners and for those who wish to have a reliable and durable machine in their homes.

Its **compact dimensions** and small turning radius make it ideal for working in the narrowest parts of green areas, around trees and flowerbeds.

The operator can enjoy **maximum driving comfort** because of the quietness of the machine during use, the cushioned seat and the electric drives for cutting height adjustment and grass catcher tipping.

The **front deck** provides full visibility of the working area, prevents grass from being pressed in the cutting area and facilitates clearing under branches and bushes.

You can choose the cutting mode!

TOP mode for the most demanding grass conditions with maximum performance;
ECO mode for lighter grass conditions, saving energy and prolonging battery runtime.
